

Apéndice B: Códigos de Lugares

La siguiente lista de códigos por estado contiene todos los códigos de las variables de lugares. Esto significa que en la mayoría de los casos, el significado de un código de un lugar va a ser dependiente del código del estado correspondiente. La lista ha sido dividida en cuatro secciones generales: códigos genéricos, lugares en Haití, lugares en Estados Unidos, y otros lugares en el extranjero. Lugares de Haití corresponden a los *Departamentos y Arrondissement*.

Códigos genéricos

Para todas las variables de carácter geográfico existe un grupo de códigos que son comúnmente usados:

0000 Código de encubrimiento (para proteger la confidencialidad)
8888 no aplicable
9999 desconocido /observaciones desconocidas

Códigos solo para lugares en EE.UU.:

7777 Lugar existente, pero que esta establecido fuera del MSA /ciudad.

Nota: Los códigos Genéricos de lugares son solamente códigos-geográficos los cuales no son específicos por cada estado.

Lugares en Estados Unidos

Los códigos de lugares de los Estados Unidos se refieren a la área-estadística-metropolitana y son los códigos del FIPS, como han sido asignados por la oficina de Administración y Presupuesto (Office of Management and Budget (OMB)) en 1993. Estos códigos aunque no dependen en un solo estado como los códigos de Haití, son solamente aplicables cuando la variable del estado correspondiente cae en el rango entre 100 y 199.
